HANNA HERALD WINS TROPHY FOR BEST EDITORIAL PAGE

At the annual convention of the Alberta Division Canadian Weekly Newspaper Association held at the MacDonald hotel, Edmonton, on October 6 and 7th, H. J. Ford, editor of the Lacombe Globe was elected to the presidency of the Alberta Division for the ensuing year. Other officers elected were, R. L. King, Clar esholm Local press, first vice-pres., L. D'Albertanson, Chauvin Chronical, second vice-pres., Miss Hazel McCrea, Hanna Herald, re-elected secretary-treasurer.

Awards of the Grain and Milling Advertising Service for best publications were presented by Mr. Cecil Lamont, manager of Winnipeg.

First prize for publications with over 750 circulation was awarded to Charles Clark, editor of High River Times, and for papers under 750 to H. G. Halliwell, editor of the Coleman Journal and president of the Dominion association.

The H. G. McCrea memorial trophy presented for the first time this year by the Alberta Division for the best editorial page was awarded to the Hanna Herald, founded by the late H. G. McCrea in 1912. Papers were scored on a point system covering all that goes into making a good newspaper.

Elmer Thompson was a twin visitor this week.

CANADIAN FLIERS 'BEST IN WORLD'

Ottawa, Oct 16th (CP) Germany's new trade and other arrangements with Russia do not alarm Lord Riverdale. While he declined to discuss the Russian situation in detail, he had this to say in an interview:

It is an extraordinary thing that Germany, which got Lenin, Trotsky and the other Bolsheviks out of Switzerland to create a revolution in Russia in 1917 is now bringing them back into Europe to create revolution again."

Lord Riverdale, an individualist who speaks his mind freely, is enthusiastic about the prospect of training thousands of British, Australian and New Zealand pilots, observers, air gunners and wireless operators in Canada. He wants to get on with the job without delay and hopes to have the scheme moving within a month.

The response of the people of the British Empire to the war service has been marvelous, he said, adding: "Canadian fliers are the best fighters in the world."

Mr. C. E. Neff was a Chinook visitor Thursday.

Mrs. L. Robinson was a Hanna visitor Tuesday.

Women Sign For Voluntary Service In Chinook

Mrs. E. H. Tarrant has been appointed registrar for Chinook and district. The week of October 16 to 21 has been selected. Every woman in this district is requested to call at the Chinook C. N. R. Station to register by Saturday.

Threshing Again Underway

Indian Summer; the children on the play ground, the hum of the combines and threshing machines all proclaim it, and farmers are making use of every minute to finish the belated harvest work.

To those not conversant with the different methods of garnering "the golden grain" a drive through the country at the present time is both interesting and instructive.

In one field we passed a combine was cutting and threshing, while a big truck stood ready to haul the grain to the elevator. In a second field stock teams were busy hauling big loads of sheaves to a threshing machine, while in an adjoining field, in which grain had been cut loose and stacked, a sweep was at work hauling the stocks to the threshing machine. The stocks were lifted "bodily" from the field and delivered in tact at the machine.

Two teams of horses, one on either side of the sweep pulled it out to the field where the horses were reversed—work for a skilled driver—the stock loaded in one operation and shoved, not pulled, to the threshing machine.

With a few days more fine weather all the pleasant hum and bustle of the out door work will be over, but merchants and business people will be busy reaping returns from the best crop harvested in Chinook district for years.

Farm Fire Losses

Official statistics show that in the ten year period, 1929-38, farm fire losses in Canada, exclusive of dwellings, amounted to over \$36,000,000 in 41,705 fires, an average loss of \$863 for each of these farm conflagrations. Now, over three and half millions of dollars going up in smoke every year is a substantial loss to the nation and a loss of \$863 represents quite a serious item to the individual. There are very few farmers in the Dominion who could regard the loss of over \$860 in the space of a few hours, and probably as the result of carelessness, as a matter of little consequence.

For this reason, it is highly important that some reflection be given to the principal causes of these fire losses on the farm in the hope that the knowledge thus gleaned will result in material curtailment of these hazards in the future. Fortunately, this problem has been tackled by the office of the Dominion fire commissioner at Ottawa, and much valuable information has been gained as a result of the study made by officials of that department.

The information, however, is of little practical value unless it is digested and borne in mind, with the remedy kept in the forefront as a guide for future conduct.

Eight Major Causes

Of the known causes of loss of farm property in Canada by fire, it is authoritatively stated that eight of them are responsible for 85 per cent. of the total. Since precautions can be taken to eliminate these losses entirely or reduce them to an infinitesimal minimum, there seems to be no reason why the fire loss on the farm should not be curtailed very substantially.

There are very special and even more urgent reasons why every precaution should be taken to prevent an outbreak of fire on the farm. One of these is the absence of adequate and mechanized fire fighting apparatus which is available in greater or less degree in every town and even in some of the smallest of villages. Another reason is the lack of a copious supply of water under pressure to fight fire. A third is a lack of man power quickly available to detect and cope with outbreaks and a fourth is the much greater risk of loss of life by fire in the country in the winter months than in the towns and villages because of the comparatively greater distances which separate neighbors.

Importance Of Prevention

All of these factors indicate the importance of practising preventive measures against fire on the farm and especially those which are related to the eight major causes previously cited and which are briefly discussed in the following paragraphs:

1. Defective chimneys and flues—Chimneys should be cleaned out regularly and not allowed to burn themselves out, as sparks often escape through cracks in the chimney and set fire in the attic, or they may drop on dry, combustible roofing, setting fire to it. The safest type of chimney is a good brick chimney, built from the ground up and lined with fire clay or vitrified clay of a thickness of at least 3% of an inch.

2. Sparks on combustible roofs—This hazard can obviously be eliminated by means of incombustible roofing material instead of a material that will ignite readily when exposed to sparks or flying brands from other fires.

3. Lightning—The tremendous toll of life and property damage annually caused by lightning can be materially reduced by means of well installed lightning rods which have proven to be nearly 100 per cent. efficient.

4. Spontaneous combustion—On farms this occurs most frequently in undecayed or damp hay, although it also takes place in numerous other substances. To guard against this hazard, the following precautions should be observed: (a) Cure all hay well; (b) Do not pack hay; (c) Do not place straw, fodder, bundles of grain or grass hay either at the bottom or top of mows of alfalfa, clover or soybean hay; (d) Guard against wetting of hay in storage from a leaky roof or open doors and windows; (e) Ventilate hay as much as possible after it has been stored; (f) Avoid, if possible, wide, deep, moist woods.

5. Matches—Make sure that your matches are completely out before discarding them. A good practice is to break them in two after the flame has been extinguished. Always strike matches away from you. Keep matches away from children and do not permit smoking in barns or near combustible material. During threshing operations insist on everybody clearing their pockets of matches and place them in a safe container.

The Gasoline Peril

6. Gasoline or kerosene—Gasoline or kerosene should never be used to start or revive a fire. Avoid the use of gasoline, benzine or other inflammable liquids for cleaning floors or clothes. There are safe and cheap solvents on the market for these purposes. Never fill lamps, lanterns, kerosene or gasoline stoves, while they are burning. If necessary to keep small quantities of gasoline, it should be kept in an approved safety can painted red and plainly marked "gasoline". Small quantities of kerosene should be kept in closed cans of a size and shape different from that holding gasoline in order to lessen the chance of mistaking the one for the other.

7. Heating equipment—Heating equipment should be properly installed and operated and maintained. Wooden floors under stoves should be well protected. The sides and back of stoves and ranges should be at least three feet from woodwork or wood-lath and plaster partitions. Avoid long runs of smoke pipes. The sections should be securely joined and the pipes supported at frequent intervals. Smoke pipes should be at least 18 inches from unprotected woodwork. They should not pass through floors or closets or enter a chimney in an attic, and they should be cleaned at least twice a year.

8. Electrical wiring—Electrical wiring and repair work should be done by a competent electrical contractor. Circuits should not be overloaded and fuses of the correct amperage (15 amperes for the ordinary branch circuits) should be used. Disconnect irons, curling tongs, heating pads and other appliances when not in use.

Lion cubs are marked by dark spots, which gradually fade until the 600 A.D., had a career of almost 3,000 years under Babylonian, Greek, Persian and Arab rule.

Indians used bark and leaves of witch hazel shrub to relieve pain.

Advice is cheap—a lot of it at any price.

To Promote Production

Provinces Pledge Their Support In Efforts For Food Supplies
At a conference between Ministers, Deputy Ministers and other officials of the Provincial Departments of Agriculture and the members of the recently formed Agricultural Supplies Committee, held in Ottawa, September 27th and 28th, the fullest co-operation of the provinces with the committee in any effort to promote the production of essential food products to meet the needs of Britain and her Allies and the people of Canada, was pledged.

Hon. James G. Gardner, Dominion Minister of Agriculture, at the opening session of the conference said it had been called with a view to getting co-operation in an effort to insure that food supplies are available for the Allies and the people in Canada. He explained that the fact should be kept in mind that the war will end some time and consequently it would not be advisable to plan now on definite lines of production, but so that the industry of agriculture should not be thrown out of gear when the war does end.

Dr. G. S. H. Barton, Deputy Minister of Agriculture, said that it was the hope that the Agricultural Supplies Committee would act as a clearing house for co-ordinating the various agricultural services that are assigned to do special duties in connection with the war. He explained that as yet the fullest information was not available as to just what food products would be required. All that the conference could hope to do for the time being is to shape a tentative program. One of the biggest contributions to the war efforts that can be made, he said, is by the sending of supplies for the Allies.

While it will be necessary to concentrate in this direction, the organization must be prepared to be readily readjusted in the light of needs and conditions as they develop, but the plans can nevertheless be prepared on a sound and efficient basis.

Dr. Barton said it was plainly apparent that the temper of people of Canada is that this war shall not be one of great profit to anyone.

An outline of the present position of production in relation to supplies of essential food products was given to the conference by different officials of the Dominion Department of Agriculture.

A. M. Shaw, Director, Marketing Service, who is chairman of the Agricultural Supplies Committee, presided at the sessions of the conference.

Do This If You're NERVOUS

Don't take chances on products you know nothing about. If you are nervous when there's need of a good general system that will help you, try Dr. Pierce's Golden Vegetable Compound, made especially for women from wholesome herbs and roots. It gives you a strong, healthy body, builds up more physical resistance, and thus aid in curing many nervous diseases. It also makes food more digestible and makes life worth living.

For 30 years one woman has told another how to go "smiling thru" with "Plinkham's—Thousands of women have written to us for remarkable benefits—**IT MUST BE GOOD!**

Canadian Apples

Must Find A Larger Market For Apples In Canada

The apple is the king of fruits and its price is high, one large apple alone providing 100 calories. Under ordinary circumstances, the annual average export of apples from Canada is approximately two and a quarter million barrels, out of an average annual crop of more than 5,000,000 barrels. This year's crop is estimated at 5,135,000 barrels, owing to the probable drastic curtailment of shipping as a result of the war, it will consequently be necessary to find a larger market for apples in Canada. Apples are good food at any time, either as fresh fruit or cooked in the variety of ways they can be used in the diet.

Apples, in their prime, grow from six to seven feet in a single season, but they have only a few seasons to live.

Textile fibres from fish skin are now in Italy.

POOR DIGESTION

If your digestion is bad, your food will not nourish your body. Dr. Pierce's Golden Vegetable Compound stimulates the digestive juices and helps the smooth digest food. It has been used by the entire body is nourished. Mrs. Mary McKale of 253 Chippewa Street, Winnipeg, says: "I used to get up at night, would belch gas, I ate little, was weak and tired. Dr. Pierce's Golden Vegetable Compound helped me up just wonderfully. It improved my digestion and I feel strong again. It has helped me to regain my normal weight and strength again. Get Dr. Pierce's Golden Medical Diet today."

Visiting The C.N.E.—61 Years Old

The Largest Annual Fair In The Dominion
(By Pratt Kuhn)

The Canadian National Exhibition at Toronto is not the only annual fair in this Dominion, but it is certainly the largest—the most complete and the most visited by people from all over the world and especially our American cousins.

A striking fact this year was that—despite the two great fairs at New York and San Francisco, the C.N.E. was hundreds of thousands admissions ahead of the two, combined, a record to be proud of, because many feared a slump and that our people would flock over the border.

The C.N.E. is a great thing for Canada—a reflection of everything new and good in the field of science and industry superimposed on the real backbone of the fair which is agriculture and animal husbandry.

Of course, the real moments are really necessary—hence the midway (called Frooland at the C.N.E.) and the hot dog and hamburger industry—but, back of the froth were such things this year as:

Fascimile Printing—in which a small daily paper illustrations and art is sent through the air and received in print through a machine at the rate of a radio.

Television Reception—where a person in one room is seen and heard in the next or fifty miles away by a special radio attachment. As yet 50 miles is the limit because television rays do not "bend" with the earth as do radio.

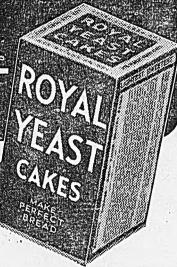

Cold Light—where a lamp at one end of a special rod is conducted through any kind of bend and delivered at the other end. Wonderful for dentists, surgeons, etc.

Modern houses, I fear, have no space for libraries as our fathers knew them. The urge to possess books of one's own is slowly but surely dying out. My architect friend went on to say that few of the houses built to-day could accommodate a library of any size.—Belast-News-Letter.

Libraries In Homes Appear To Be Fast Dying Out

"Librarian" writes: I rather astonished a young architect the other day by asking him whether he ever planned for a library in modern houses. "Never," was his reply.

Modern houses, I fear, have no space for libraries as our fathers knew them. The urge to possess books of one's own is slowly but surely dying out. My architect friend went on to say that few of the houses built to-day could accommodate a library of any size.—Belast-News-Letter.

Officers Meet Again

Three Serving Together As They Did In Last War

In 1914 these officers went to France with the same regiment in the original Expeditionary Force.

Each fought through the war; came out in the end with memories of more than four years of comradeship.

Peace, however, parted them. Not once in the last 20 years had they met, until—

At the outbreak of war three officers were called up again, and again the three were serving together.

Alaska is to have a fully-equipped laboratory for research on its fishery products.

"A" is the first letter in all alphabets of the world, except the Ethiopians.

MR. CAFFEINE-NERVES... The Boss Outwits Him

Dies In Exile

Count Von Bernstorff Was Prominent Figure In Great War
Count Johann Heinrich von Bernstorff, German ambassador whose assignment in Washington ended with the United States' entry into the Great War in 1917, died in Geneva of heart disease, a refugee from his own country since the rise of the Hitler regime.

Von Bernstorff, the last ambassador to represent Imperial Germany in the United States capital, was 76. At his bedside was his wife, the former Jeanne Luckemeyer, of New York.

Von Bernstorff, a leading social figure in pre-war Washington, and an object of American hatred in 1917, lived almost as a recluse for the past five years.

He came of a noted German diplomatic family. His father was ambassador to Great Britain when Johann was born in London in 1862. The younger Bernstorff was sent to the United States in 1908. He served in Washington until he was given his passport Feb. 3, 1917, two months before United States declared war.

He often warned his government in 1914 that its course was leading the United States into the war.

"My task was done when the Lusitania incident was disposed of without America's entry into the war," he once remarked. "After that, the question of peace or war depended not on me, but upon the Wilhelmstrasse and the great army headquarters."

"They knew exactly that a repetition of the Lusitania incident or the unlimited extension of submarine warfare would automatically mean war with the United States. But they would not listen."

Mother Of Princess Pats

Jenny Morris Is Prepared To Look After Canadian Soldiers Again
Jenny Morris, "Mother of the Princess Pats" in the first Great War, is ready to look after the boys again this time—the entire Canadian Expeditionary Force if necessary.

"I am doing my darndest—no better say utmost—to be ready for them when they arrive," she said.

And "darndest" means this remarkable lady is preparing to her lovely home at Stanmore, Middlesex, in order to be able to rent a building in London as a retreat for the Dominion's tired warriors.

At the moment Jenny has an eye on a house in Bedford Place, near the building she made famous the last time. She will pay every penny of the cost of renting and equipping it herself.

Jenny says scores of old soldiers already have written her to find out whether she will be dispensing her almost legendary hospitality again. Her reply in her Scottish-accented voice, just as clear to-day as 20 years ago is:

"Boys, I love you all, I wouldn't trust you with anyone else."

Meanwhile Jenny ("the boys accuse me of being at least \$2," she says), is working the night shift in Metropolitan Police canteens in various parts of London "to keep in practice."

British Censorship

Rules Laid Down Are Now Some-what Less Executive

The British press censorship, which caused widespread dissatisfaction among newspapermen at the start of the war, has improved to such an extent that complaints are now rare.

In the early days, before the censors were shaken down in their new jobs, long delays were common and correspondents never knew whether their copy had been passed, rejected or butchered.

Now the censors telephone politely if there is even a delay in passing the copy.

Copy filed by The Canadian Press goes through censorship in cable company offices, but the censors there must submit doubtful copy to their head office at the ministry of information.

Recently a correspondent wrote a story after visiting the R.A.F. training school. The story contained a few figures which the censor felt might help the enemy. He telephoned that he was deleting one paragraph, but listened to an argument that the figures were incomplete and that no calculations could be based on them. Finally he deleted only three words.

The Right Spirit

Film Star Returns To England To Offer Her Services

Anne Neagle, English film star who has been seen in several notable pictures in this country, recently completed an engagement in Hollywood. She will return at once to England to offer her services to the British Government.

"I could never stay here comfortably, making an enormous salary, while England is in this mess," Miss Neagle said the other day. "If there is nothing else for me to do, they might need me to entertain behind the lines."

That is the spirit that is animating the British people everywhere, even in the British Isles.

Engineers calculate that, in the tropics, the sun vanishes on a single square mile during an eight-hour day, energy equivalent to that released by the combustion of 7,400 tons of coal.

The Fred Olson Steamship line

vessels out of London have figures

that heads at their prow, a revival of the ancient custom that dead with

CHAPTER VII.—Continued

McCord's eyes lit with approval. "Here you are and you've walked with a heavy pack to get here."

"No, I had to circle some lakes and swamp country, but I had little trouble making it. To-morrow we must drop downstream to help Noel up river with that canoe load."

McCord nodded. "You left them, you say, where they couldn't find their way back to the main stream without a guide in weeks?"

Alan laughed. "That country's a network of lakes and muskeg. They're likely to get into Whale water and be on their way to Lake Blivenne before they find out their mistake. They'll be lucky if they don't strike the freeze-up before they get out."

"Good boy! You did a good job on them, Alan. Now let's get back to the main stream without a guide in weeks?"

"McCord exhaled a cloud of tobacco smoke as his eyes wrinkled in an amused look. "I ought to know him," he said drily. "I had to look at that face for two years or more."

McCord's eyes lit in amazement. "Why! You—must know him!"

McCord exhaled a cloud of tobacco smoke as his eyes wrinkled in an amused look. "I ought to know him," he said drily. "I had to look at that face for two years or more."

Gov't War Fund

Coffers of the finance department were enriched by \$1,000 yesterday, donated by a New York woman to aid in Canada's war effort. Finance Minister Hon. J. L. Ralston, announced receipt of the gift from the woman who asked that her name be withheld.

In an accompanying letter she said:

"There are no strings attached to this gift. This is just a small effort to clarify my position of backing the democracies against the totalitarian. I wish to make no loans. Nor yet to buy bonds. In short I wish to keep right a way from any notion of waxing fat on the bones of dead men."

"I cannot forsee what my own national neutrality laws may for bid or allow in the future, but I hope you will hear from me, in like manner, from time to time, as my savings permit."

It was also announced Prime Minister Mackenzie King had received a cheque for \$500.00 from St. Catharines, Ont., to be used for charitable purposes.

DEFENCE OF CANADA REGULATIONS, 1939

Regulation No. 39. No person shall by word of mouth:—

(a) spread reports or make statements, false or otherwise, intended or likely to cause disaffection to His Majesty or to interfere with the success of His Majesty's forces or of the forces of any allied or associated Powers or to prejudice His Majesty's relations with foreign Powers, or

(b) spread reports or make statements, false or otherwise, intended or likely to prejudice the recruiting, training, discipline, or administration of any of His Majesty's forces.

39A. No person shall print, circulate or distribute any book, newspaper, periodical, pamphlet, picture, paper, circular, card, letter, writing, print, publication or document of any kind containing any material, report or statement, false or otherwise.

(a) intended or likely to cause disaffection to His Majesty or to interfere with the success of His Majesty's forces or of the forces of any allied or associated Power, or to prejudice His Majesty's relations with foreign Powers, or

(b) intended or likely to prejudice the recruiting, training, discipline or administration of any of His Majesty's forces, or

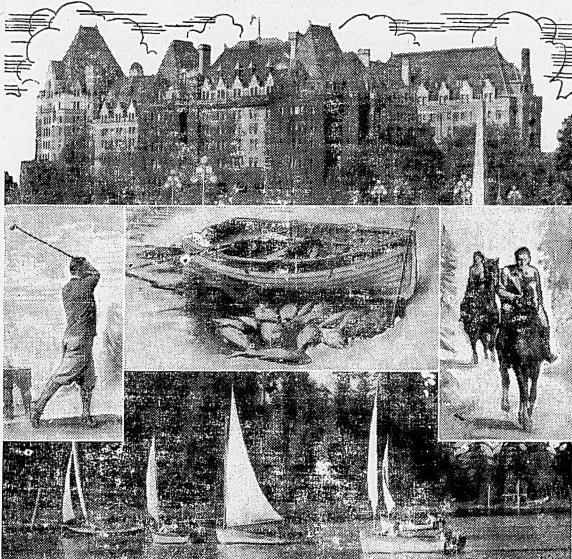

(c) which would or might be prejudicial to the safety of the state or the efficient prosecution of the war.

Golf, Tennis, Fishing, Riding, Yachting
Victoria Sports During Winter Months

Golf, tennis, lawn bowling and fishing may be the only winter sports to meet Canada's winter sports to Victoria, beautiful Island capital of British Columbia, where snow is a novelty, flowers bloom throughout the year, and overcoats are excess baggage.

Best known of the winter attractions is the Mid-Winter Golf Tournament which will be held this year on the Royal Colwood course, March 3-9. Keen competition, a special course, and golfing weather, added to the many prizes of which the most important is the trophy presented by Sir Edward Beatty, make the tourney one of the most popular in B.C.

Winter fishing is a major sport in Brentwood Bay where sizeable fish are caught by trolling. Fly fishing for steelhead salmon up to 20 pounds is found in east-slope rivers such as the Oyster, Cowichan, Chemainus, Nimpkish and Big and Little Qualicum.

Riding, hiking, lawn bowling, boating are but a few more sports that are as popular in Victoria in winter as in summer. Fiestas are arranged from time to time, and some flowers have begun to bloom. Probably the most picturesque celebration is the Christmas festival in Old English style, complete with bear's head, yule logs, Wassail bowl and carols.

Victoria and the Empress Hotel have been the scene of many social events during the winter months. A real impetus has been given this season by the fact that foreign exchange under war pressure makes a Canadian dollar worth considerably more in Canada than in the United States.

Mrs. W. S. Lee was a Hanna
visitor on Tuesday.
Mrs. K. Hohler was a Drum-
heller visitor this week.
Mrs. Thos. Gilchriston visited
her daughter, Mrs. McCallum
of Hanna.
